# PAVER APPLICATIONS

## Pedestrian

Designated for areas that are primarily for pedestrian applications, including commercial plazas that may require occasional access for emergency or maintenance vehicles, as well as residential driveways.

## Light Vehicles

Designated for commercial vehicular areas, access ways, and parking lots where only cars and light trucks are anticipated. Heavy vehicles should have limited access and use.

## Occasional Heavy Vehicles

Designated for vehicular areas, parking lots, and roadways where limited heavy vehicles are anticipated daily, such as large delivery trucks or garbage trucks.

## Frequent Heavy Vehicles

Designated for vehicular areas, parking lots, and roadways where heavy vehicles are a regular component of the daily traffic volume.

*Paver application icons are general recommendations. Site conditions and pavement cross section must be considered. Paver application icons are based on placement over unbound aggregates for setting beds, base and subbase.*

# PAVER COLORS & FINISHES

## Colors

*Please contact your local Belgard Representative about additional special order colors. Lead times may vary.*

## Finishes

Manufacturing processes generate various finishes that are distinctive and can create the exact look you desire for your project. All processes are not available in all locations. Check with your local Belgard Sales Representative for more information.

### Standard (smooth)

Unit surfaces and micro-chamfers are carefully molded using a high-quality precision machined steel shoe assembly which creates units with an extremely smooth surface and precision detailed chamfer.

### Textured (slate)

Units are molded to form a surface that emulates natural stone with a sculpted, textured finish.

## DuraFusion™

DuraFusion fuses a top layer of rich pigments with Belgard's core color process. The result is a paver with a richness and purity of color that's sleek and vibrant.

## DuraFusion™ + ColorTech™

DuraFusion™ + ColorTech™ multiplies the enhancement of DuraFusion™ with the protection of ColorTech™ to offer the highest quality concrete paver available today. The result is a smooth, gentle finish and vibrant color blend with unmatched protection against fading, stains and scratches.

*NOTE: Color selection for above may vary slightly across all paver lines. Contact your Belgard Representative for exact color selections. Turfstone available in natural gray only.*

*\* May be Suitable for ADA applications. Always evaluate site-specific uses to ensure surface suitability. Product installation and surface maintenance influence compliance with ADA Standards for Accessible Design Section 302 Floors or Ground Surfaces. Tumbling or antiquing pavers can also create surface or edges that may make the product unsuitable for ADA applications.*

*Interlocking pavers can be used for a variety of different vehicular applications. Appropriate shape and thickness is based on project-specific conditions including type of loading, base design, and subgrade conditions. It is recommended that you consult a Belgard representative in your area before specifying products for vehicular applications.*

## RESISTANT TO FREEZE THAW

Freeze thaw resistant—100% frost-free and properties remain unaltered at temperatures ranging from -51.1° to + 60° C (-60°F to +140°F).

## RESISTANT TO BREAKAGE

Because every slab can withstand loads of over 2200 lbs.

## RESISTANT TO CHEMICAL AGGRESSION

Because our pavers are unaffected by alkalis, acids, chemical agents, salt and other de-icing materials.

## RESISTANT TO STAINS

Because a high density and ultra-low absorption rate creates a tight paver surface, it fends off surface mold, moss, dirt and other types of stains.

## EASY TO LAY

Because of superior accuracy in dimensional sizing and linear sides, the pavers allow for perfectly executed installations with tight and accurate lines.

## EASY TO CLEAN

Because it can be cleaned with normal household cleaners and even pressure washed with a **low pressure** washing device.\*

## EASY TO REMOVE

Because a 24" x 24" slab weighs just 37 lbs., its light weight permits easy removal, serviceability and even reusability. (Excluding adhered installations).

## EASY FOR YOU

Because the structured top textures formed on the surface of our pavers create non-slip surfaces.

*\* It is important that all pressure washing of your porcelain pavers be done with a low pressure washer with a maximum of 1600 psi and nothing more powerful. When pressure washing your installation, care should be taken to prevent damage to the grout (adhesive and grout installations) and some re-sanding will be necessary when power washing an installation with sand or polymeric sand joints.*

# ROOFTOP PAVERS & PEDESTALS

Possibilities are endless when designing and building plaza decks using Belgard Commercial Pedestals. The pedestal system's elevation range of 1/8" - 36" allows for building plaza decks over almost any sloping or difficult surface.

Building plaza decks over occupied space has never been easier. The unique screw-to-adjust feature eliminates tedious and time-consuming installation often associated with constructing level decks over sloping surfaces. Construction crews quickly level each plaza paver by adjusting pedestal height, even while loaded.

Future access to waterproofing entails simply removing specific plaza pavers. Pedestal adjustments within the allowed range are accomplished by merely adjusting pedestal height and you're done – saving time and money.

## SPECIFICATIONS

- Supports up to 1000 lbs.
- Maximum elevation up to 36" using couplers and braces
- Impervious to water, mold & freeze-thaw
- Preassembled
- Packaged in weather-resistant boxes
- Contains 20% post-industrial recycled material
- Engagement "bumps" warn of over-extension

## RESOURCES AVAILABLE

# PROFESSIONAL SUPPORT

### ENVIRONMENTAL SOLUTIONS

Belgard consultants can work with your team to develop the best PICP system design or retaining wall configuration to control runoff volume and discharge rates, improve the quality of local groundwater, reduce or prevent downstream impacts, and minimize the land consumed for stormwater management.

### CAD FILES

For your convenience, Belgard offers a constantly expanding library of easy-to-download CAD files of our products and patterns.

### CONTINUING EDUCATION

Belgard offers a variety of ongoing educational programs for our industry partners, including Lunch & Learns.

### SITE PLANNING

The experts at Belgard can help you optimize your site in a number of ways—whether you're looking for creative ways to define public spaces, manage or harvest stormwater, or increase the useable space for development.

[BELGARDCOMMERCIAL.COM](https://www.belgardcommercial.com)

### ENGINEERING SERVICES

Our team of design consultants can help address both aesthetic and engineering design concerns, material quantity estimates and permit ready plans.
